

Intrusion detection stars

Panoramic ceiling mount motion detector

5 years
warranty

- 3 separate and fully adjustable PIR sections for 360° coverage
- Instant response from the first step with First Step Processing technology
- Ease of installation due to hinged chassis and base plate
- High efficiency LED and light pipe system for easy walk testing

BOSCH

Panoramic ceiling mount motion detectors

3 separate and fully adjustable PIR sections for 360° coverage, delivered with a masking kit, to mask the coverage of specific areas if needed

Your solution for detecting intruders in areas where wall mount detectors face limitations. In buildings with an open floor plan or with many ground-level obstacles, vertical detection will give better results than horizontal detection. This includes scenarios such as warehouses, open offices with cubicles or convenience stores with shelves. The panoramic ceiling detector ensures a perfect overview and ultimate detection.

With a long history of patented, award winning performance in the field of intrusion alarm systems, you can rely on high-quality products. Using innovative processing technologies such as First Step Processing and Dynamic Temperature Compensation ensure rapid and reliable detection, while virtually eliminating false alarms.

Easy wiring
hinge chassis and base plate + 45° terminals for easy access

Easy installation
several mounting locations

Easy adjustment of the detection field
large dials + adjustment table

Offices with cubicles

Convenience stores with shelves

Warehouses

Panoramic ceiling mount motion detector

Specifications

Type	PIR
Commercial Type Number	DS939
	
Application risk level	Moderate risk
Coverage / range	Up to 14m x 360°
Mounting height	2.4 to 6.1m
First step processing	■
Dynamic temperature compensation	■
Microwave noise adaptive processing	-
Current draw	12 mA
Certification	CE, UL, EN 50131-2-2
Warranty 	5 years
